Fascinating Fizz

Time To Enter the Beautiful New World of Alternative Sodas

With all due respect to the colored fizzy water of our youth, *that was then*. Today, every drop diverted from these great “adult” sodas is a wasted calorie.

Izze

Izze calls itself sparkling juice. We don't care, as the old joke goes, we just hope it calls us to dinner. The rich dark fruit of *Sparkling Blackberry* and the fruitier *Pomegranate* can easily substitute for a glass of red wine at dinner for those who don't partake of wine but would like something more than water. *Grapefruit* and *Pear* stand in well for the whites. We're just a little bit in love with this line. We may name our firstborn Izze.
